ECO-FRIENDLY SNOWBLOWERS

SINGLE-STAGE SNOWBLOWERS
- FOR EASY USE AT HOME

QUIET, ENVIRONMENTALLY FRIENDLY AND EASY TO MANOEUVRE

AL-KO ST 4048 with battery and SnowLine 46 E with electric motor are suitable for small areas and fresh snow up to 30 cm deep.

These single-stage models with modern brushless motors, low weight and compact design guarantee high power and flexible manoeuvrability. In a simple one-step operation, the auger collects the snow and ejects it directly through the discharge chute.

EASY TO HANDLE

Ideal for home use, SnowLine 46 E and ST 4048 can be adjusted to your height and are always ready for use. When the snow has melted, the shaft can be folded for space-saving storage.

LOW WEIGHT

The ST 4048 and SnowLine 46 E weigh only 15 kg. The compact design and practical handle make transport easy.

ADJUSTABLE HANDLE

The height of the handle is easily adjusted with a tension screw.

SPACE-SAVING STORAGE

When the snow is gone, the snowblower can be stored conveniently and space-efficiently thanks to the folding handle.

	ELECTRIC SnowLine 46 E**	CORDLESS ST 4048*
For areas up to*	150 m²	300 m²
Engine / power	2.000 W, 230 V	Li-ion max. 36 V, 4 Ah / 5 Ah / 8 Ah
Operating / charging time up to		4 Ah: 20 / 90 min. 5 Ah: 30 / 120 min. 8 Ah: 40 / 180 min.

AL-KO 36 V III

LITHIUM-ION TECHNOLOGY

The AL-KO 36 V battery range is perfect for ambitious gardeners looking for a wide and powerful range of machines for home and garden.

BATTERY B 160 Li

Li-ion 36 V
4,0 Ah
Art. no. 114 099
EAN 400 371 806 5978

CHARGER C 130 Li

Li-ion 36 V
3,0 A
Art. no. 113 281
EAN 400 371 805 5290

BATTERY B 800 Li

Li-ion 36 V
8,0 Ah
Art. no. 114 017
EAN 400 371 806 3950

DOUBLE CHARGER
C 200 Li

Li-ion 36 V
2 stk. 3,0 Ah
With Wi-Fi
Art. no. 114 018
EAN 400 371 806 3967

ST 4048 WITHOUT BATTERY AND CHARGER	
Art. no.	113 591
EAN	400 371 805 7959

ST 4048 SET INKL. 4,0 AH BATTERY AND CHARGER	
Art. no.	113 635
EAN	400 371 805 8888

SnowLine 46 E**	
Art. no.	112 932
EAN	400 371 804 5147

* Maximum area coverage depends on the conditions as well as the battery capacity.
** * When using SnowLine 46 E, an extension cable of appropriate length is required, not included.

PETROL SNOWBLOWERS

POWERFUL TWO-STAGE SNOWBLOWERS
- FOR AREAS WITH HEAVY SNOWFALL

HIGH TRACTION FOR LARGE AMOUNTS OF SNOW

Thanks to powerful, winter-friendly OHV engines and reversible wheel drive, two-stage snowblowers are very easy to handle. The wheel drive is independent of traction, allowing the snowblower to run continuously. Thanks to the two-stage clearing system, strong winter-friendly OHV engines and wheel drive, these snowblowers are extremely easy to manoeuvre. In the first stage, the snow is shovelled in through the feed auger and collected. In the second stage, the snow is ejected through the discharge chute. The SnowLine series always comes with a durable steel discharge chute that can easily be rotated up to 190°, so that the snow lands exactly where you want it. Depending on the weight of the snow, it is thrown up to 15 metres away via the rotating chute.

LOW PETROL CONSUMPTION

These two-stage models with powerful engines ensure high performance with low fuel consumption.

PRACTICAL ON DARK WINTER DAYS

The large SnowLine models are equipped with a powerful LED panel. The lighting is activated automatically at power on and is very useful when clearing snow in the evening or early morning. These models also have electrically heated handles.

CONVENIENT SNOW REMOVAL

Thanks to the compact control panel, all important functions are easily accessible right in front of you.

On the large SnowLine models, the discharge height is easily adjusted with a handle.

FIND THE MODEL THAT SUITS YOUR NEEDS

Whether you need to clear your driveway or large areas such as car parks or long sidewalks, AL-KO has a snowblower to suit your needs.

CORDLESS SNOWBLOWER

With ST 4048 you get an easy-to-drive, relatively strong and handy snowblower. Battery operation ensures environmentally friendly snow removal at low noise levels. On a single charge, you can clear up to 200 m² - even more with an extra battery.

ELECTRIC SNOWBLOWER

SnowLine 46 E is powered by a strong, environmentally friendly 230 V / 2 kW electric motor. With this model you get a quiet snowblower that is easy to assemble and manoeuvre and easy to store.

PETROL SNOWBLOWERS

Petrol snowblowers are the best choice in areas with a lot of snow.

With large, robust rubber tyres or crawler tracks, AL-KO petrol models provide optimal traction even in difficult conditions. The large models have electric start, which guarantees a quick start in sub-zero temperatures, and also comes with heated handles.

The best choice in areas with particularly heavy snow is the SnowLine 760.4 LED. The impressive working width of 76 cm and crawler tracks ensure optimal grip on icy surfaces and slopes.
